

Agriculture and Food Security

George Gardner

- Require MOA to have a strategic plan to make policies to minimize the impact of HIV/AIDS.
- Use the “tool kit” already available for use in developing a plan at MOA.
- Removing the “stove pipe” format in USAID which discourages cross-sectoral work on problems such as AIDS.

- Address the land tenure issues.
- Share the Zambia experience through workshops and emails; also Uganda.
- Keep an open mind to technologies to improve household food productivity, including crop protection chemicals.
- Get USAID to work more cross-sectorally for dealing with AIDS (loss of agriculture knowledge must be addressed cross-sectorally.)
